Version Date

9 August 2005

Function Reference/get usernumposts

Description

Returns the post count for the user whose ID is passed to it. Properties map directly to the wp_posts table in the database (see [Database Description](#)).

Usage

```
<?php get_usernumposts(userid); ?>
```

Example

Default Usage

The call to `get_usernumposts` returns the number of posts made by the user.

```
<?php echo('Posts made: ' . get_usernumposts(1)); ?>
```

Posts made: 143

Parameters

userid

(*integer*) The id of the user whose post count you want to retrieve.
