9 August 2005

Template Tags/comment author email link

Description

Displays the comment author's email address, as a mailto link. An email address must be provided if "User must fill out name and email" is enabled under [Discussion Options](#). This tag must be within [The Loop](#), or a comment loop.

Note: Displaying email addresses is not recommended, as it provides spam collection tools the opportunity to cull them from your site.

Usage

```
<?php comment_author_email_link('linktext', 'before', 'after'); ?>
```

Examples

Default Usage

```
email: <?php comment_author_email_link(); ?><br />
```

Link Text and Styling

Displays comment author's email link as text string **Email Comment Author** and adds arrows before and after the link to style it.

```
<?php comment_author_email_link('Email Comment Author', ' > ', ' < '); ?>
```

> [Email Comment Author](#) <

Parameters

linktext

(*string*) Link text for the email link. Default is the comment author's email address.

before

(*string*) Text to display before the link. There is no default.

after

(*string*) Text to display after the link. There is no default.
