# Template Tags/permalink anchor

## ***Description***

Outputs a [permalink](#) anchor identifier or id (<a id="....") for a post. This is useful for linking to a particular post on a page displaying several posts, such as an archive page. This tag must be within [The Loop](#).

## ***Usage***

```
<?php permalink_anchor('type'); ?>
```

## ***Example***

Inserts the permalink anchor next to a post's title.

```
<h3><?php permalink_anchor(); ?><?php the_title(); ?></h3>
```

## ***Parameters***

type

(*string*) Type of anchor to output. Valid values are:

- 'id' - Anchor equals numeric post ID. This is the default.
- 'title' - Anchor equals postname, i.e. [post slug](#).

## ***Related***

[permalink\\_anchor](#), [get\\_permalink](#), [the\\_permalink](#), [permalink\\_single\\_rss](#)
