## Template Tags/print AcmeMap Url

### ***Description***

Displays the [URL](#) to a [ACME Mapper](http://www.acme.com/mapper/) (<http://www.acme.com/mapper/>) generated map for your location. If the tag is called from within [The\\_Loop](#), the Latitude and Longitude entered for a post is inserted in the query string of the URL for the map. When called outside The Loop (or inside The Loop, but no Lat/Lon was entered for a post), default Latitude and Longitude for the weblog is inserted in the query string.

### ***Usage***

```
<?php print_AcmeMap_Url(); ?>
```

### ***Example***

```
<a href="<?php print_AcmeMap_Url(); ?>">Locate me with ACME Mapper</a>
```

### ***Parameters***

This tag has no parameters.

### ***Related***
