# Template Tags/print DegreeConfluence Url

## ***Description***

Displays the [URL](#) to the nearest integer degree intersection [Confluence](#) (<http://www.confluence.org/>) page for your location. If the tag is called from within [The Loop](#), the Latitude and Longitude entered for a post is inserted in the [query string](#) of the URL to the page of the nearest integer degree confluence. When called outside The Loop (or inside The Loop, but no Lat/Lon was entered for a post), default Latitude and Longitude for the weblog is inserted in the query string.

## ***Usage***

```
<?php print_DegreeConfluence_Url(); ?>
```

## ***Example***

```
<a href="<?php print_DegreeConfluence_Url(); ?>">What integer degree intersection am I near?</a>
```

## ***Parameters***

This tag has no parameters.

## ***Related***
