Template Tags/print GeoCache Url

Description

Displays the [URL](#) for a [Geocaching](http://www.geocaching.com/) (<http://www.geocaching.com/>) generated list of geocaches near your location. If the tag is called from within [The_Loop](#), the Latitude and Longitude entered for a post is inserted in the [query string](#) of the URL for the geocache locations. When called outside The Loop (or inside The Loop, but no Lat/Lon was entered for a post), default Latitude and Longitude for the weblog is inserted in the query string.

Usage

```
<?php print_GeoCache_Url(); ?>
```

Example

```
<a href="<?php print_GeoCache_Url(); ?>">Locate geocaches near me</a>
```

Parameters

This tag has no parameters.
