Template Tags/print GeoURL Url

Description

Displays the [URL](#) to a [GeoURL](http://www.geourl.org/) (<http://www.geourl.org/>) page listing websites near your location. If the tag is called from within [The Loop](#), the Latitude and Longitude entered for a post is inserted in the [query string](#) of the URL for the list. When called outside The Loop (or inside The Loop, but no Lat/Lon was entered for a post), default Latitude and Longitude for the weblog is inserted in the query string.

Usage

```
<?php print_GeoURL_Url(); ?>
```

Example

```
<a href="<?php print_GeoURL_Url(); ?>">Locate sites near me with GeoURL</a>
```

Parameters

This tag has no parameters.
