Version Date

9 August 2005

Template Tags/print Lon

Description

Displays the Geographic (geodata) Options Longitude setting. If the tag is called from within [The_Loop](#), the Longitude entered for a post is displayed. When called outside The Loop (or inside The Loop, but no Longitude was entered for a post), the default Longitude setting for the weblog is displayed.

Usage

```
<?php print_Lon(); ?>
```

Example

```
<p>Trip locale: <?php print_Lat(); ?>Lat, <?php print_Lon(); ?>Lon</p>
```

Parameters

This tag has no parameters.
