Template Tags/print MapQuest Url

Description

Displays the [URL](#) for a [MapQuest](#) (<http://www.mapquest.com/>) generated map of your location. If the tag is called from within [The Loop](#), the Latitude and Longitude entered for a post is inserted in the [query string](#) of the URL used for generating the map. When called outside The Loop (or inside The Loop, but no Lat/Lon was entered for a post), default Latitude and Longitude for the weblog is inserted in the query string.

Usage

```
<?php print_MapQuest_Url(); ?>
```

Example

```
<a href="<?php print_MapQuest_Url(); ?>">MapQuest map of my location</a>
```

Parameters

This tag has no parameters.
