Template Tags/print MapTech Url

Description

Displays the [URL](#) to a [Maptech](http://www.maptech.com/) (<http://www.maptech.com/>) generated geographical map for your location. If the tag is called from within [The Loop](#), the Latitude and Longitude entered for a post is inserted in the [query string](#) of the URL used for generating the map. When called outside The Loop (or inside The Loop, but no Lat/Lon was entered for a post), default Latitude and Longitude for the weblog is inserted in the query string.

Usage

```
<?php print_MapTech_Url(); ?>
```

Example

```
<a href="<?php print_MapTech_Url(); ?>">Maptech map of my location</a>
```

Parameters

This tag has no parameters.
