# Template Tags/print TopoZone Url

## ***Description***

Displays the [URL](#) to a [TopoZone](#) (<http://www.topozone.com/>) generated topographic map for your location. If the tag is called from within [The Loop](#), the Latitude and Longitude entered for a post is inserted in the [query string](#) of the URL used for generating the map. When called outside The Loop (or inside The Loop, but no Lat/Lon was entered for a post), default Latitude and Longitude for the weblog is inserted in the query string.

## ***Usage***

```
<?php print_TopoZone_Url(); ?>
```

## ***Example***

```
<a href="<?php print_TopoZone_Url(); ?>">Topographic map of my location</a>
```

## ***Parameters***

This tag has no parameters.
