### **Version Date**

9 August 2005

# Template Tags/wp get links

## ***Description***

Displays links associated with a numeric link category ID. This tag uses the settings you specify in the [Links Manager](#). For control over the formatting and display of your links within the tag's parameters, see [get\\_links\(\)](#).

## ***Usage***

```
<?php wp_get_links(category); ?>
```

## ***Examples***

### **Links by Category Number**

Show links for link category 1.

```
<?php wp_get_links(1); ?>
```

### **Include Before and After Text**

Mimic the behavior of [get\\_links\\_list\(\)](#) but *do* respect the "Before Link", "Between Link and Description", and "After Link" settings defined for Link Categories in the Links Manager.

```
<ul>
  <?php
    $link_cats = $wpdb->get_results("SELECT cat_id, cat_name FROM $wpdb->linkcategories");
    foreach ($link_cats as $link_cat) {
      ?>
      <li id="linkcat-<?php echo $link_cat->cat_id; ?>"><h2><?php echo $link_cat->cat_name; ?></h2>
        <ul>
          <?php wp_get_links($link_cat->cat_id); ?>
        </ul>
      </li>
    <?php } ?>
</ul>
```

## ***Parameters***

category

(*integer*) The numeric ID of the link category whose links will be displayed. You must select a link category, if none is selected it will generate an error.
