Template Tags/wp get linksbyname

Description

Displays links associated with the named link category. This tag uses the settings you specify in the [Links Manager](#). For control over the formatting and display of your links within the tag's parameters, see [get_linksbyname\(\)](#).

Usage

```
<?php wp_get_linksbyname('category'); ?>
```

Example

List all links in the category called "Favorites".

```
<?php wp_get_linksbyname('Favorites') ?>
```

Parameters

category

(*string*) The name of the category whose links will be displayed. No default.
